- Safety: Flame retardant housing
- Eco Designed
- SmartPower²

Product highlights

Lodgenet® HD Built-in
By partnering with Lodgenet, Philips is able to offer you the most convenient and cost effective way to add televisions to a Lodgenet system. Guaranteed to work and certified by Lodgenet, these sets will allow you to sleep as worry free as your guests. No more worrying whether the TV's will arrive before the PPV terminals or cards, and best of all no more costly room visits to install. Because these sets are so easy to install and they work so well with Lodgenet, Lodgenet even offers discounts for those who purchase them (check with your local Lodgenet rep for details).

Pro:Idiom™ Plus
Pro:Idiom™ was created for the hospitality industry to protect first run movies and other HD premium content from piracy. Philips Pro:Idiom™ Plus televisions offer secure HD content protection not only for PPV hotels, but now also for stand alone properties. (Additional fees may apply for stand alone use) (Pro:Idiom™ is a trademark of the Zenith Corp.)

VTrack™ forensic watermark
Philips VTrack™ watermarking embeds an invisible forensic watermark in the signal, which can be detected via software to trace pirated content back to the source of recording. Philips VTrack™ is the first solution that protects first run movies and other premium content from optical piracy, helping preserve the early release window that hotels have always enjoyed.

MPEG-4 for HD
MPEG-4 (Moving Picture Experts Group H.264) compression technology allows more HD content to be delivered than ever before. Satellite providers are already using MPEG-4 to offer the choice of up to 150 national HD channels and 1,500 local broadcast HD and digital channels. Cable, broadcast, and telecommunications providers are expected to also migrate to the format, but with these Philips TVs you are ready today!

Five Star Service
Philips offers unmatched commitment to keeping your guest rooms in working order. Our products are so reliable that we offer a two-year advanced exchange warranty. In the event that something does go wrong, we guarantee to ship a replacement set to you, within 72 hours during the first year.

SmartPower² and ESP
Our second generation power saving technology allows the backlight intensity to be dynamically adjusted by the system to reduce the power consumption by up to 60%, saving substantially on energy costs. In addition, Philips' Energy Savings Programmability (ESP) allows the set to turn itself off when not in use to save even more energy when guests or maids leave televisions on for long periods while the room is vacant.

RoHS & Flame retardant housing
In additon to being lead-free and RoHS compliant, Philips TVs have a special housing of eco-friendly, non-brominated flame-retardant materials. Independent tests carried out by emergency fire services have shown that whereas TVs can sometimes intensify fires caused by external sources, Philips TVs will not contribute to the fire.

USB media autoplay
Philips TVs feature a USB connector that allows the guest to connect USB memory sticks to play music or photos right on the TV.

* Five Star Advanced Exchange warranty is valid in the United States only. Local warranties govern sales in other countries.
* THIS PRODUCT IS NOT TO BE OFFERED FOR SALE, SOLD, DELIVERED OR USED IN CALIFORNIA
